

PEPSICO

Streamlines Operations with Honeywell Voice Picking and Netlogistik

Pepsico, a global leader in the food and beverage industry, continuously seeks innovative solutions to enhance operational efficiency. Recognizing the need to evolve from a manual picking process to an automated, streamlined operation, Pepsico turned to Netlogistik, a trusted partner with proven expertise in implementing advanced warehouse technologies.

Challenges

Initially, Pepsico relied on a manual picking approach suitable for their traditional distribution methods. With the transition to a pre-sales model and increased unit-based picking demands, they faced new challenges:

Meeting stringent 24-hour delivery commitments.

Increasing productivity while reducing fatigue among picking staff.

Achieving precise, hands-free operations for greater efficiency.

Innovative Solution with Honeywell Voice

To address these challenges, Pepsico selected Honeywell Voice Picking technology, implemented by Netlogistik. This solution enabled hands-free, eyes-free operations, significantly enhancing productivity and accuracy. Additionally, the integration of voice-directed picking with Pepsico's existing carton flow rack infrastructure optimized operational workflow. Customized productivity dashboards provided real-time feedback, empowering workers with immediate insights to improve their performance continually.

Exceptional Results

Implementing **Honeywell Voice** technology led Pepsico to significant operational improvements:

15% Increase in Productivity: Enhanced workflow and reduced picking time significantly increased productivity in just the first phase of implementation.

Reliable 24-Hour Commitment: Faster picking operations ensured reliable and timely service delivery.

Reduced Worker Fatigue: Optimizing picking routes and processes significantly reduced physical strain, improving overall employee satisfaction.

Looking Ahead

Encouraged by these initial successes, Pepsico is expanding into the second phase of implementation, further optimizing operations and continuing to leverage Honeywell Voice solutions with Netlogistik's ongoing support and expertise.

Client Testimonial

"With Netlogistik's expertise, integrating Honeywell Voice technology transformed our manual picking process, boosting productivity by 15% right from the first phase. This innovative approach streamlined our operations, helping us consistently meet our 24-hour service commitment and providing our team with the advantage of hands-free, eyes-free efficiency."
